## Education

### Shivaji University

Bachelor of Technology in Computer Science (Percentage - 81.42)

June 2020 – June 2023

Kolhapur, Maharashtra, India

## Work Experience

### Kleverowl Solutions Pvt Ltd

May. 2024 – present

Laravel Backend Developer

Remote

- Integrated AI/ML Automation tools like the Anthropic API to develop intelligent chatbot features, including response generation and prompt engineering.
- Built scalable APIs using Laravel and MySQL, optimized complex queries, and automated deployments with Git.
- Optimized MySQL queries using indexing and query optimization techniques, improving page load time.
- Collaborated with frontend developers to implement features using the latest Laravel best practices, ensuring seamless integration between frontend and backend.

### Advisni Consultants LLP

Aug. 2023 – Mar. 2024

Web Developer

Remote

- Developed and launched custom dynamic websites for small businesses using PHP, MySQL, JavaScript, and jQuery
- Provided ongoing technical support and maintenance.
- Developed Custom APIs and Integrated Third-party APIs.

## Company Projects

### Ai-powered marketplace for local event planners and service providers | [Ceremonyy.com](#)

- Developed a web marketplace platform for vendors to list services like catering and photography. Implemented an AI-driven automation workflow using n8n to streamline marketing and vendor registration. Utilized the Google ADK to create a WhatsApp AI assistant that boosted customer engagement and streamlined event planning through personalized conversational support.

### Octans Business Management Software | [octans.afsln.com](#)

- Developed a web application using PHP and Laravel, enabling accurate costing data calculations for cloth production from yarn, with features for bulk calculations and automated generation of Excel and PDF reports.

### Pure Elements | [pureelements.in](#)

- Contributed to the development of pure element, a cosmetics sales platform, by building an admin system to track orders, manage shipping and returns, and integrate with BlueDart API for seamless logistics management.

### Veeerbhadra

- Developed the Veeerbhadra web application from scratch using Laravel 11 and the Skote frontend theme, creating a comprehensive system for a fabric dyeing industry with features like cost calculation, inventory management, and payroll management.
